Education :

NMAM INSTITUTE OF TECHNOLOGY, NITTE

B.E IN INFORMATION SCIENCE

2021-2025 | Karnataka, India

CGPA: 8.26/10

Strength/ Professional Skills :

- Detail-oriented
- Problem Solving
- Creativity
- Leadership
- Determination
- Teamwork

Technical Skills :

Proficient Skills:

- Java
- SQL
- Python
- OOPs
- Data Analytics
- Machine Learning
- Operating System
- JDBC

Familiar :

- C ++
- GitHub
- Android Studio
- Cloud Computing
- Docker
- Deep Learning

Coursework :

- Cryptography and Network Security
- Computer Network
- Database Mangement System
- Operational Management

Certification :

- DSA in Java
- Programming in Java
- Peer-to-Peer Learning

Language :

- English
- Hindi
- Japanese (Basic)

Projects:

• Warehouse Management System

This system is JavaFX application used for managing warehouse using Relation Database. This application include implementation of JDBC, Swing and MySql.

• Credit Risk Modelling

Building predictive models for credit risk assessment, leveraging machine learning algorithms and techniques to enhance decision-making processes based on customer data and financial indicators.

• Sales Prediction

Implemented data analytics to predict sales trends, enabling proactive business decisions and maximising revenue potential based on predictive insights.

• Time Series Forecasting

This project covers a range of forecasting models like ARIMA, exponential smoothing, and machine learning techniques to enable accurate predictions for applications across various industries.

Experience :

Data Analytic Intern

Accenture

April 2024 - May 2024

- Analyzed social media data to identify top-performing content categories, using engagement metrics like likes, shares, and comments.
- Cleaned and prepared data by handling missing values and standardizing formats.
- Conducted exploratory data analysis (EDA) to uncover patterns and trends through visualizations and summary statistics.
- Provided actionable insights on audience engagement and content performance.

Teaching Assistant Intern

Stealth Startup

May 2024 - Current / Remote

- Provided expert assistance to students in Data Structures and Algorithms (DSA) in Java, delivering comprehensive text solutions, debugging code.
- Conducted thorough code reviews and troubleshooting to enhance students' understanding and problem-solving skills.
- Actively participated in performance evaluations based on student feedback and the quantity and quality of resolved queries.
- Demonstrated strong time management and reliability by consistently meeting availability and responsiveness requirements.
